Monarch Bay GC: empty attempts and completed button requests

Tony Lema Course | America/Los_Angeles | Plotted at server receipt time

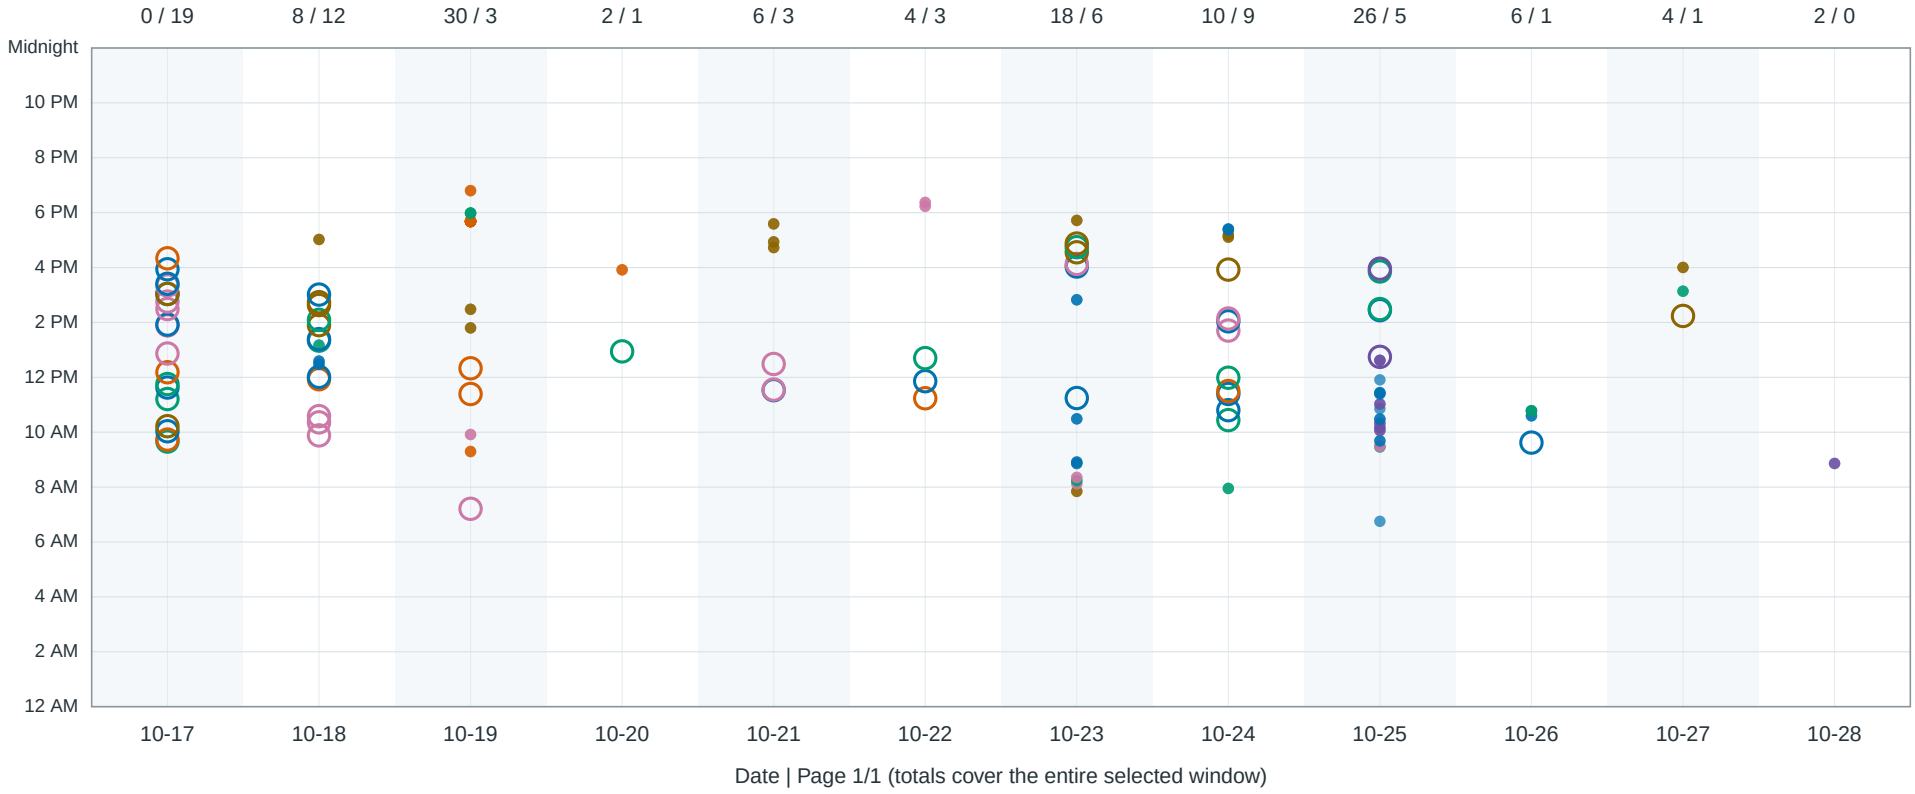
Window: Oct 17, 2026, 9:39:35.270 AM PDT to Oct 28, 2026, 10:30:04.899 AM PDT (inclusive) | As of: Oct 28, 2026, 10:30:04.899 AM PDT

- Hole 7 - FRB-0001
- Hole 5 - FRB-0002 (original)
- Hole 12 - FRB-0003
- Hole 2 - FRB-0004
- Hole 14/15 - FRB-0005
- Hole 5 - FRB-0006 (replacement)

- Empty: 116 observed rejection attempts (retries included)
- Completed: 63 completed requests

Daily counts: empty / completed; N/A = unavailable; * = partial retained coverage

Time of day (local)



Date | Page 1/1 (totals cover the entire selected window)

Retained log window begins Sep 28, 2026, 10:30:04.899 AM PDT. Coverage: retained_logs. Zero means no observed matching records, not proof of no pushes. Empty: received service-unavailable rejection attempts, including separate transport retries. Completed: accepted physical-button requests completed by as-of; counted once and plotted at receipt, not completion. Cancelled/open requests and QR activity excluded. Nearby points overlap. Logs reflect service eligibility rules in force at receipt (including historical schedule-based availability). Log retention describes availability, not guaranteed completeness. Counts are observed records; ingestion delays or historical exclusions may omit attempts. Unavailable/partial empty coverage is not zero. Completed counts may increase when requests are completed later. Reference fixture only: CPO-supplied hole labels; historical assignment dates not established. Original/replacement devices retain separate colors.
